STUDY CLUB

"Periimplantitis and Treatment Options for the Long Term Success."

The periimplant diseases are relatively common in the implant practice. There are many reasons leading to this problem. First time in Greece the speaker will present the diagnostic options and the different therapeutic options in order to achieve long term success. The role of the implant design, the periimplant hard and soft tissues, the prosthetic rehabilitation will be discussed in order to prevent periimplant problems in the future in Implant Dentistry.
