J Dent (member) and others; more than 250 publications, author of 5 books; over 500 presentations worldwide.

1-DAY WORKSHOP

DEALING WITH  
COMPLICATIONS IN  
IMPLANT DENTISTRY  
JANUARY 27, 2019

# Program Analysis

Complications in Implant dentistry are associated with surgical and prosthetic aspects and treatment approaches. **The focus on this course is the description of problems in the daily practice associated with the surgical treatment and the management of patient after treatment.** Intraoperative and early or late postoperative complications and their management will be demonstrated with multiple clinical cases and the management of the complications. The lecture will illustrate the technical approach for handling hard and soft tissue complications and guide the participants for a better clinical outcome based on medical and dental pathobiology and surgical techniques. **In the hands-on session soft tissue surgical procedures will be trained step-by-step using the pig model.**

## LECTURE

- Complications during implant Surgery
- Postoperative Patient Management
- Bone Grafting and Management of Complications
- Complications from Sinus Lift Procedures
- Soft Tissue Management around Implants to Improve Peri-implant Tissue Stability
- Peri-implant Diseases and their Management
- Soft Tissue Management around implants with Laser

## HANDS-ON

- Free Gingival Graft
- Flap Advancement for Bone Augmentation Techniques
- Ligature of a Blood Vessel for Bleeding Control

## DAILY AGENDA

**09:00pm-11:00pm**

Lecture

**11:00pm-11:20pm**

Coffee Break

**11:20pm-1:00am**

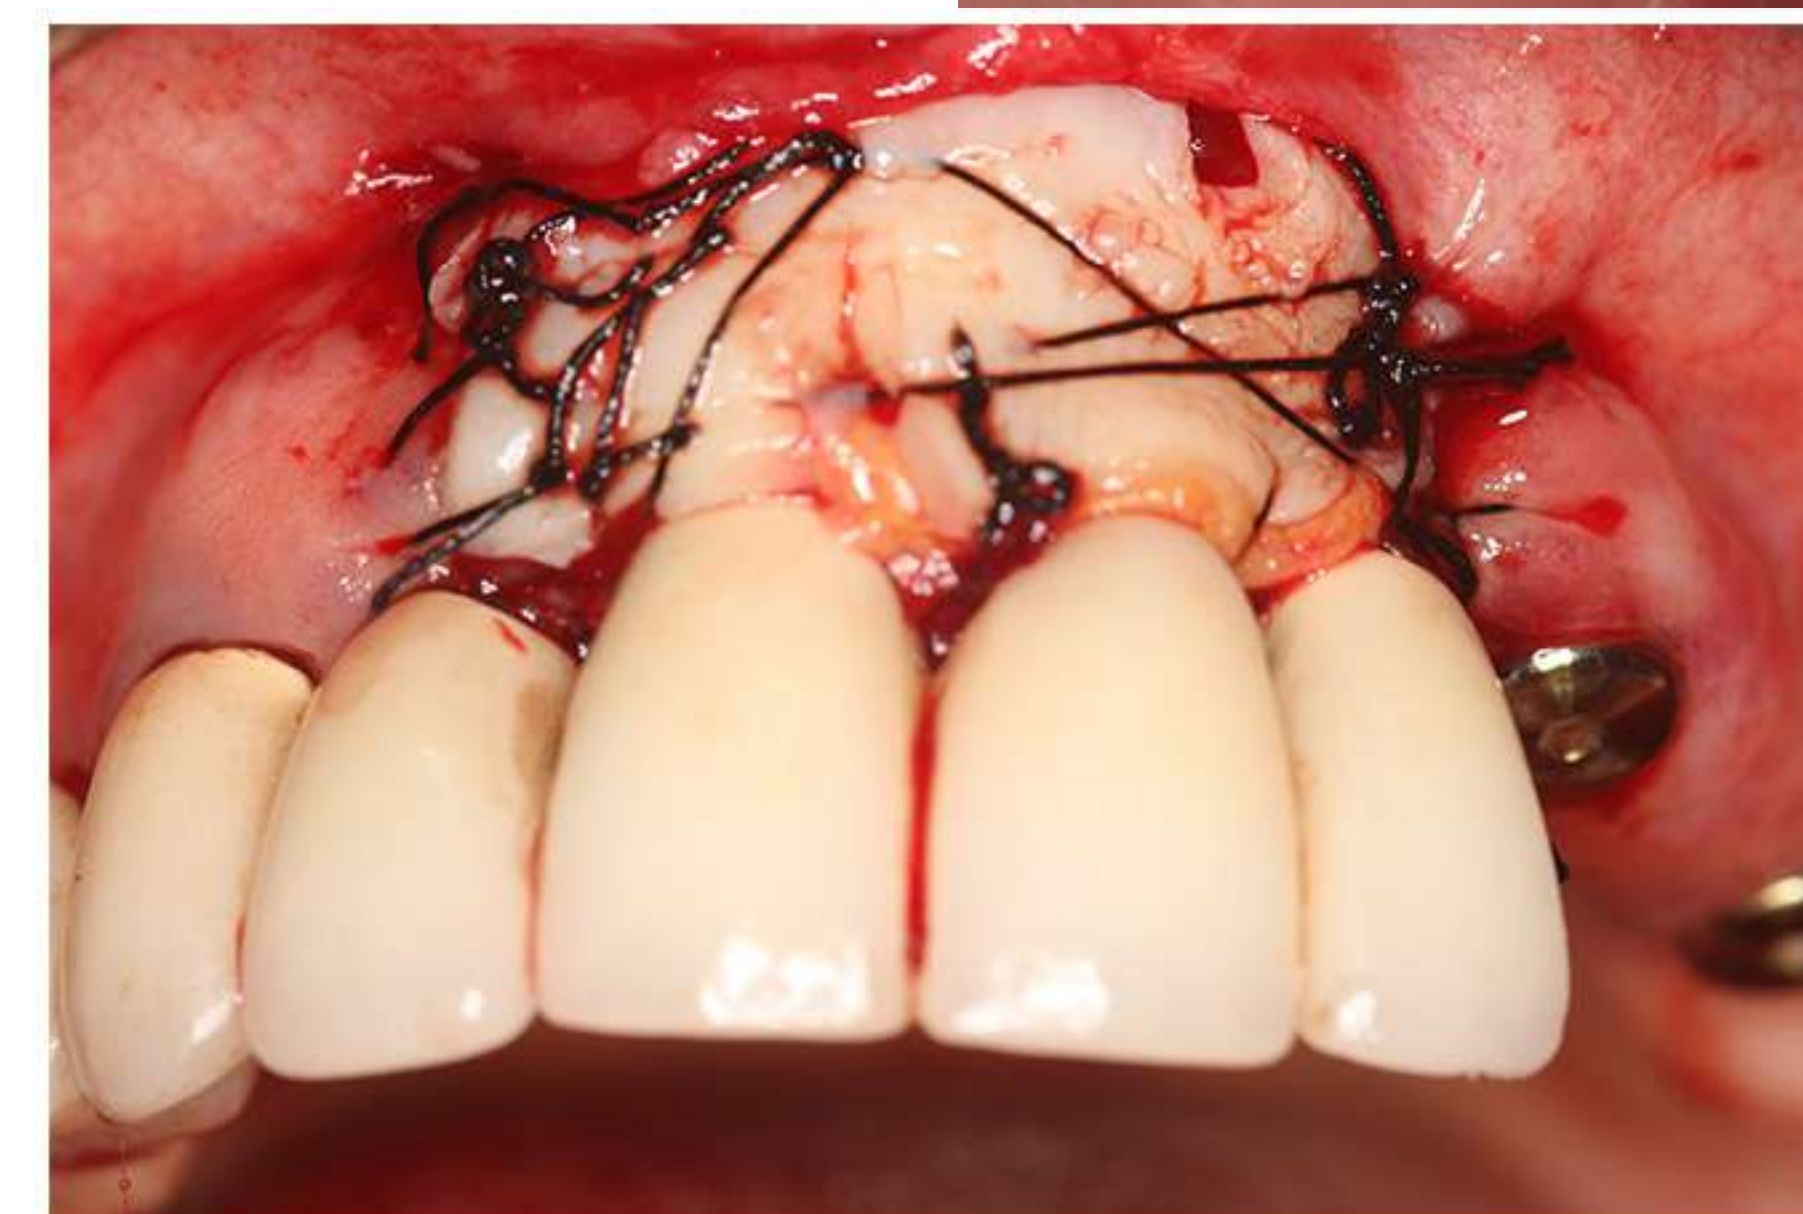

Lecture

**1:00am-2:00am**

Lunch Break

**2:00am-5:00am**

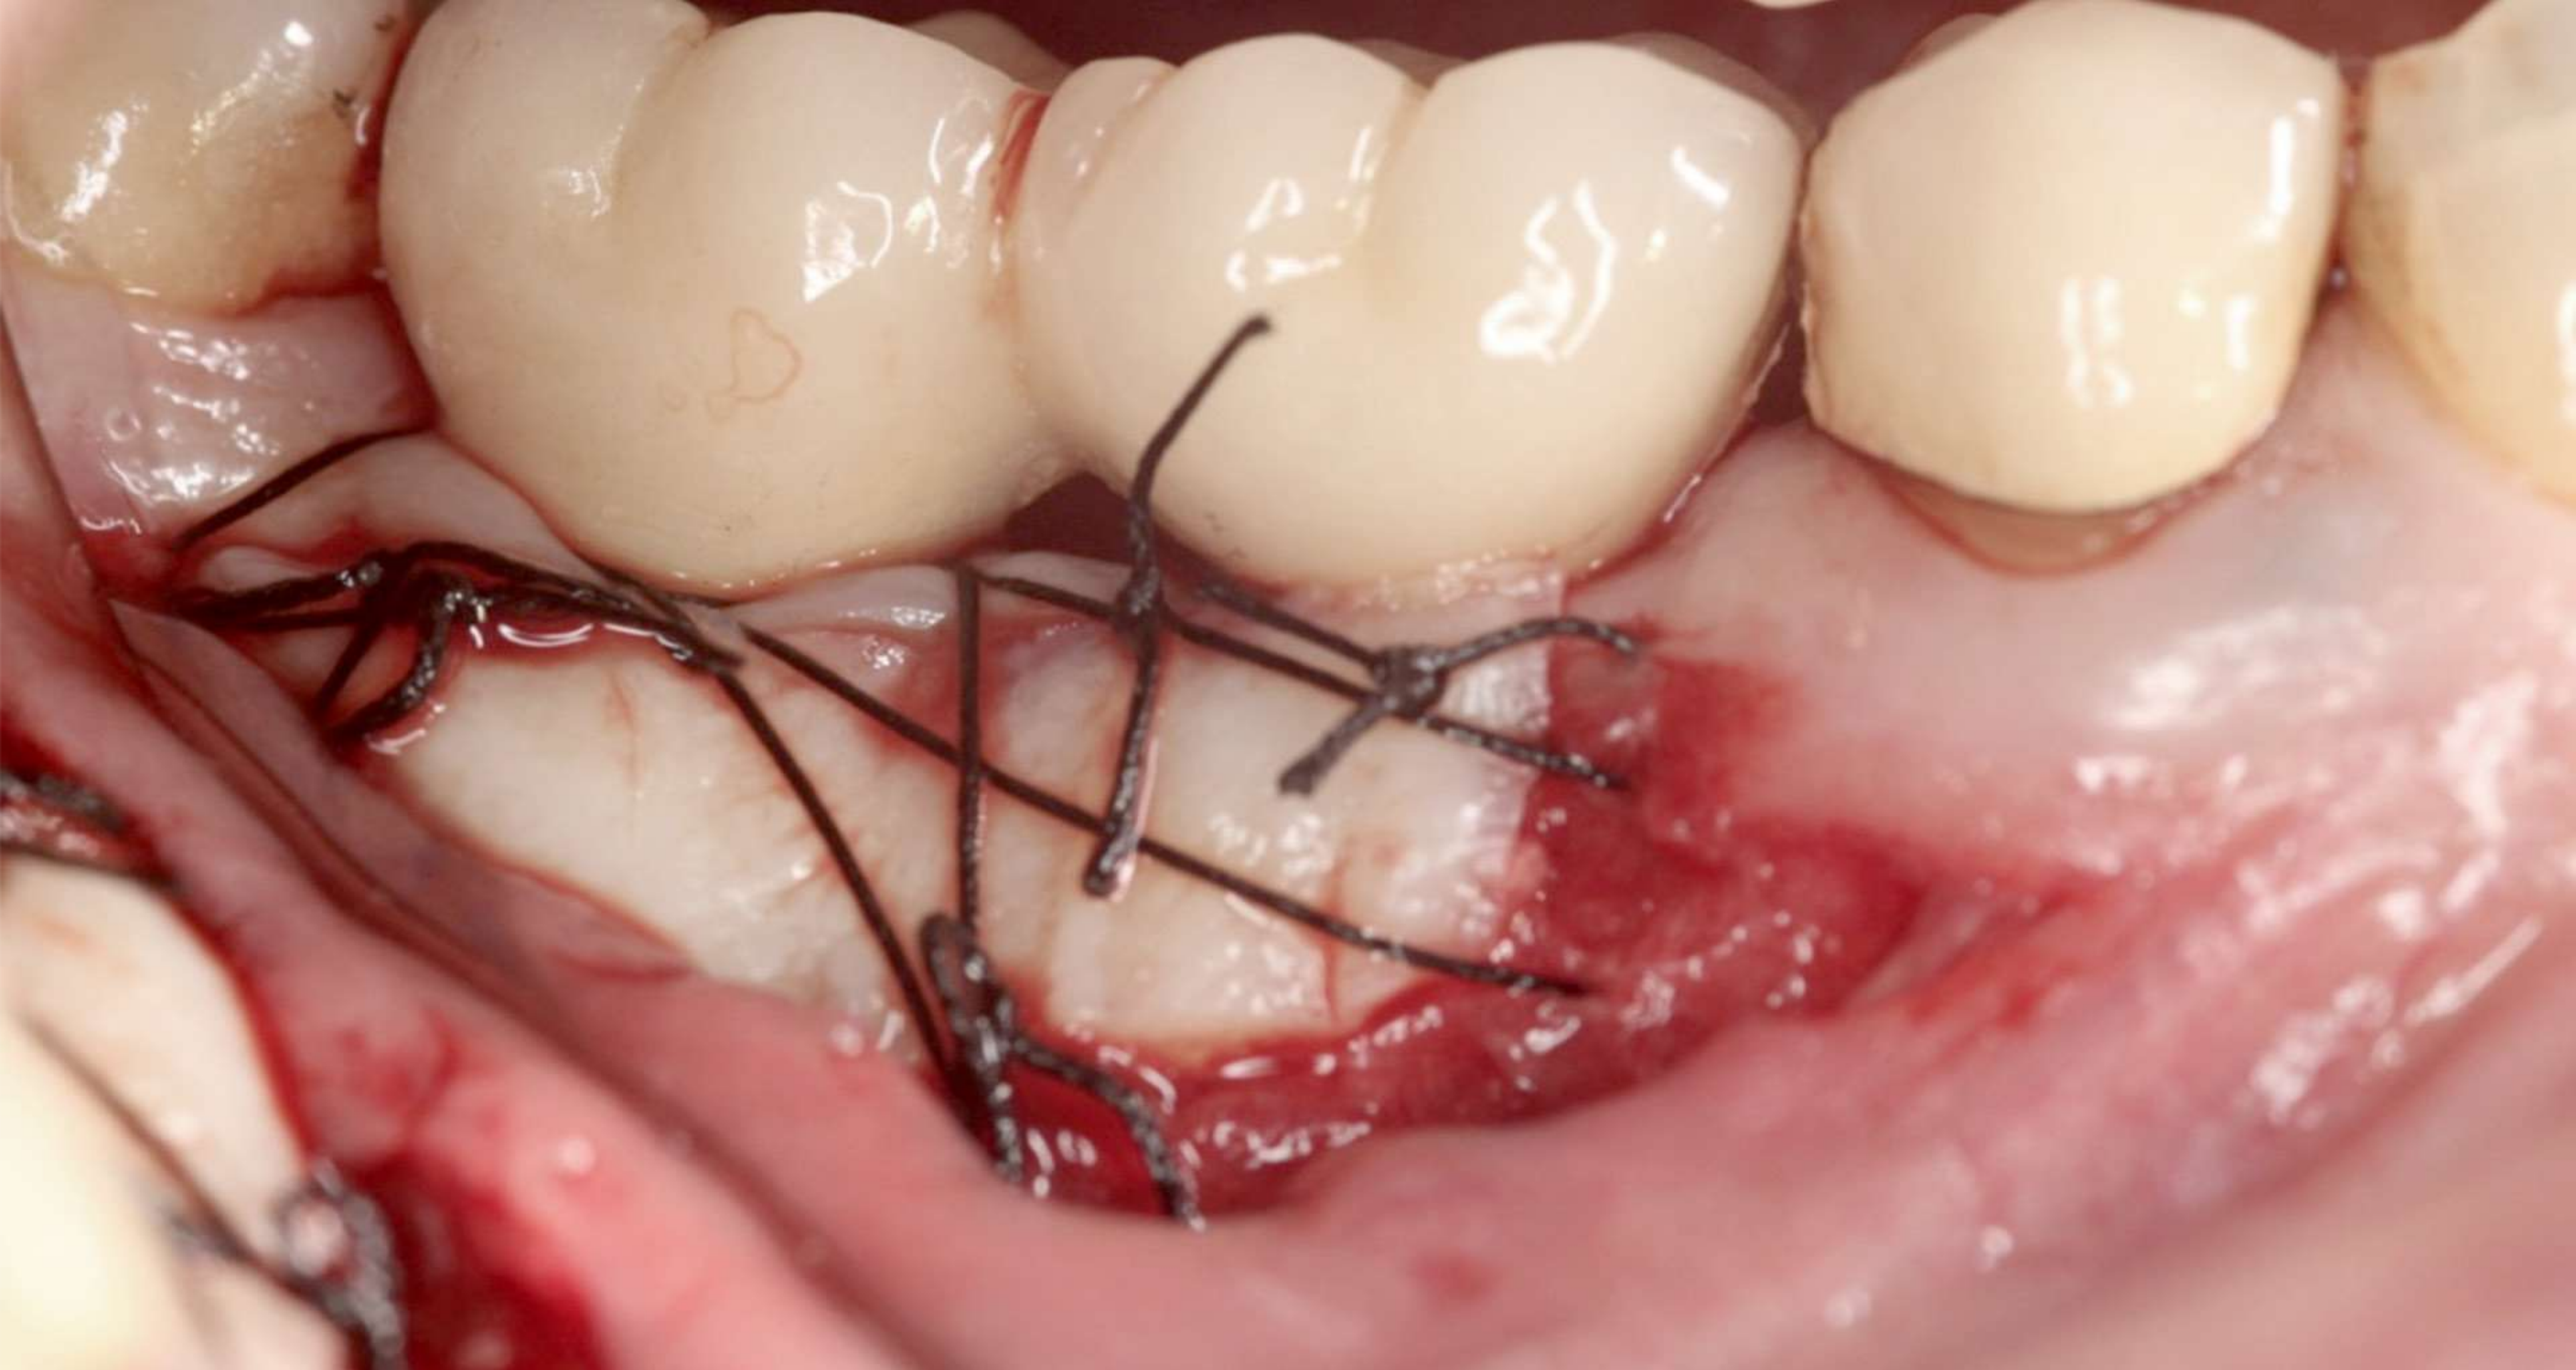

Hands-On

1-DAY WORKSHOP
