

# BIOLOGICAL BONE AUGMENTATION

The BBA Concept for Real Bone Builders

**ATHENS** APRIL 20, 2019

1-DAY COMPACT COURSE-INCLUDING HANDS-ON

**8CPD  
HOURS**

**Dr. Frank Zastrow M.Sc.**

is an experienced oral surgeon and former Senior Physician at Prof. Fouad Khoury in the clinic of Schloss Schellenstein, Germany. He leads his own private clinic in Wiesloch, Germany.

He is inventor of the BBA Concept, founder of the international facebook group REAL BONE BUILDERS and his focus is the bone and soft tissue reconstruction in complex cases.

## TRAINING DAY

**09:00 09:30**

Introducing words

**09:30 11:00pm**

First lecture about the `BBA Concept`:  
Biological Bone Augmentation- what are  
the Basics, where are the Limits

**11:00 12:00pm**

Advanced soft tissue management  
techniques (Kazanjian Vestibuloplasty,  
Apical repositioned flap, Roll flap)

**12:00 01:00pm**

Complication treatment

**01:00pm 02:30pm** Lunch

**02:30 04:00pm**

### HANDS ON PART I

Bone harvesting: Corticospongious  
bone block, cortical bone shells

**04:00 05:00pm**

### HANDS ON PART II

Lateral bone augmentation  
with Bone Shells

**04:45 05:00** Closing words

**05:00 05:15** Certificates

# BIOLOGICAL BONE AUGMENTATION

## The BBA Concept for Real Bone Builders

**In many cases bone augmentation is necessary before implants can be inserted. Additionally, the soft tissue management can be a decisive factor for the implant success. In all cases the "Goldstandard" of using autogenous bone is in competition with the use of Bone Graft Material products.**

This course gives deep insights in the Concept of Biological Bone Augmentation (BBA) with pure autogenous bone and tissue and is addressed to all clinicians, who have already own experience in augmentation techniques. Clear guidelines for the use of autogenous bone harvesting and augmentation techniques in order to achieve predicable results will be provided as well as reliable techniques in complication treatment.

### COURSE TOPICS

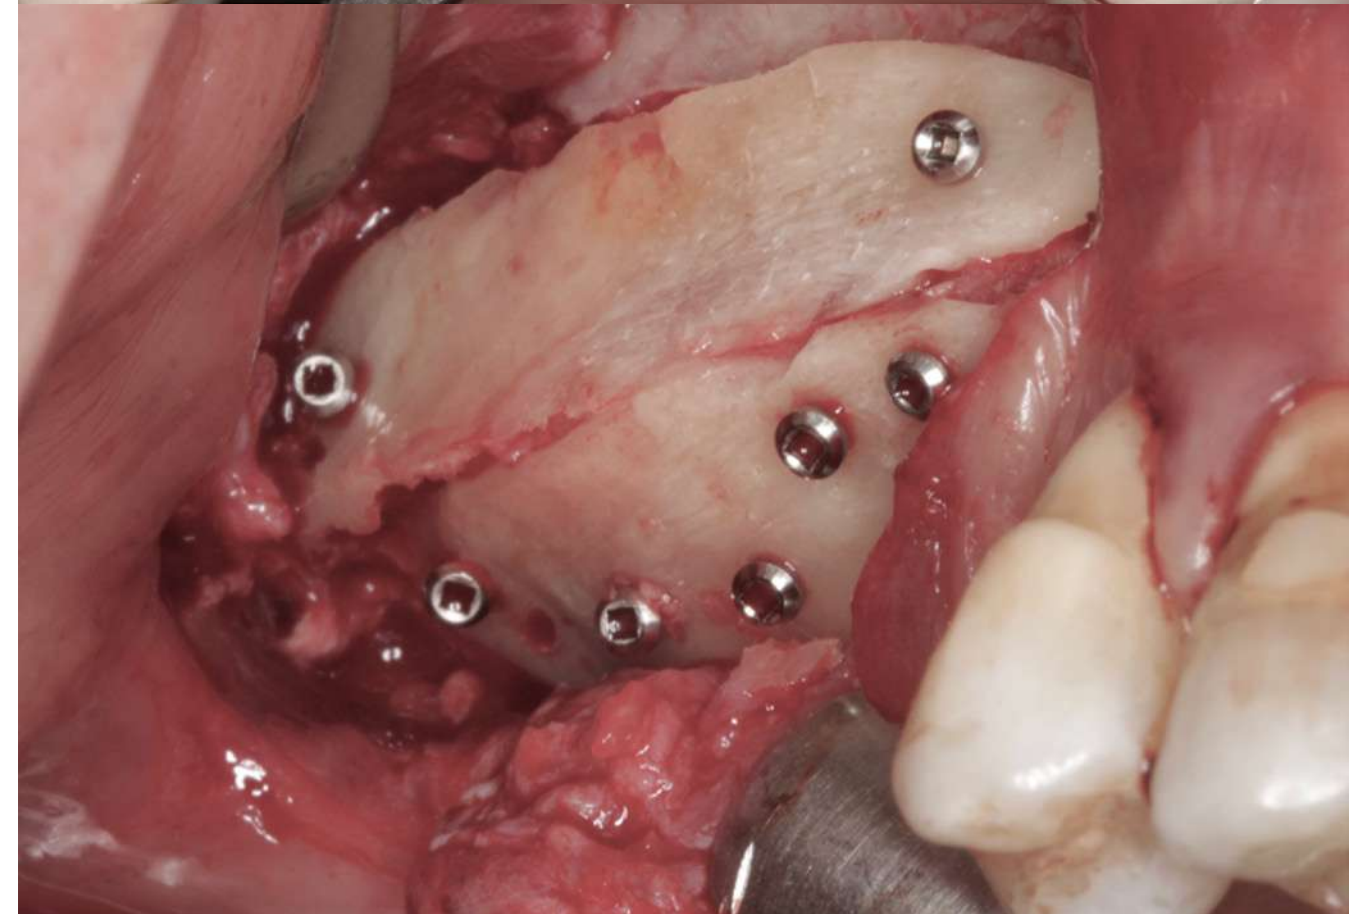

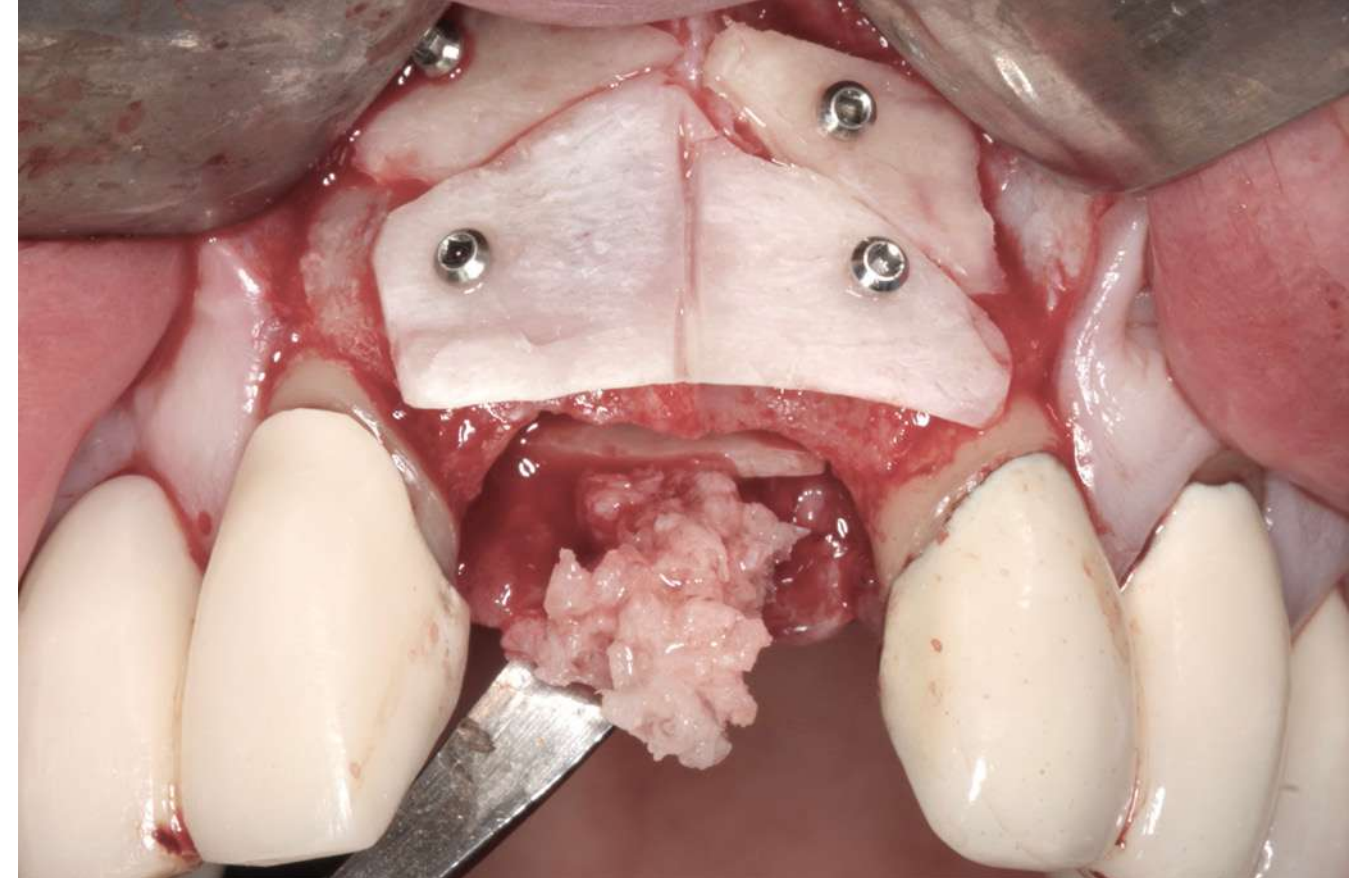

- Introduction of the BBA Concept (Biological Bone Augmentation with pure autogenous bone)
- What are the basics- where are the limits in augmentation techniques
- Lateral augmentation and advanced soft tissue management
- The atrophied edentulous maxilla- surgical and prosthetic concepts
- Complication treatment pre- intra- and postoperatively
- External sinus grafting and the layering technique
- Peri-implantitis treatment

### THE CANDIDATE WILL BE ABLE TO LEARN

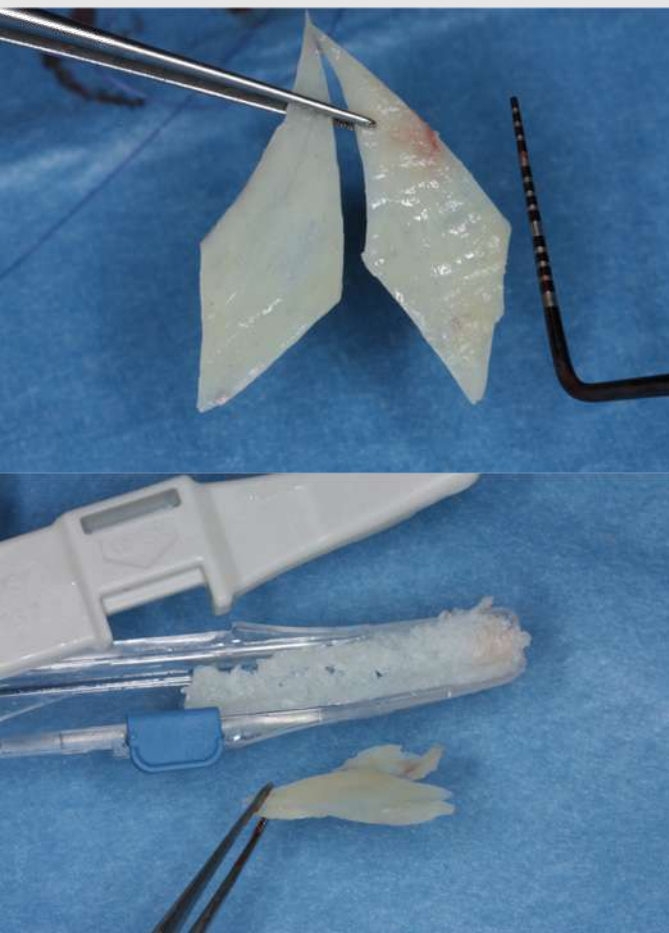

- The symbiosis of hard- and soft tissue management
- How to prevent complications in association with sinus grafting
- Diagnosis and reliable backward planning in compromised cases

In the `Simulation` session relevant bone harvesting and augmentation techniques will be simulated and trained on pork jaws.

**This course is limited to 30 participants.**

Clear guidelines for the use of augmentative procedures like autogenous bone grafting and advanced soft tissue management in order to achieve predicable results will be provided by the oral surgeon **Dr. Frank Zastrow.**
